

The Complete Jewelry Solution

By Gravograph

What's a wedding without a wedding ring? A christening without a chain bracelet or necklace? This is jewellery with real added value as a reminder of that one-off, special day. Engraving a name, date, or simple message adds an even more personal touch. It makes the difference.

As all jewellery specialists well know, this attention to detail is what makes a jeweller stand out from the crowd. We, at Gravograph, understand. We are launching a complete solution with this and jewellers' needs in mind.

THE SOLUTION

Introducing the Gravograph **M20 Jewel** machine, the solution to all your personalisation needs.

The integrated vice on the M20 Jewel allows for engraving not only medals and plates, but also the inside of rings and wedding rings. Yet, the most outstanding innovation of this machine is its capacity to engrave the **outside** of rings and wedding rings. To complete its range of applications, a pen-engraving option is also available for this machine.

When we say an "**ALL IN ONE**" jewellery solution, we mean it.

PROFESSIONAL SOFTWARE

One of the highlights of the M20 is its accompanying software.

The machine is computer-driven via **Gravostyle QuickClick**, comprehensive, user-friendly software engineered for the needs of the jewellery market (including a wealth of different fonts and advanced text management tools.)

In total synergy with the M20 Jewel, this software enables you to select the type of object to be engraved (a ring, medal or pen) and position it on the machine – quickly and easily.

SMALL AND COMPACT

With this technology comes a wide range of advantages:

- A **compact** machine (345 x 315 x 305 mm), the M20 is easy to store, however limited your workspace.

- Thanks to its **user-friendly interface**, even first-time engravers will get to grips with the machine in no time. Achieve high quality, error-free engraving in just a few minutes.

- This jewellery solution is also **modular**, designed for use with optional accessories such as the pen-engraving kit and chip collector.

BASEL 2007: Mission Seduction

On the occasion of this year's Watch and Jewellery Trade Fair in Basel, Gravograph unveiled its Total Solution for jewellery personalisation. Visitors to the Gravograph stand were unanimous in their reaction: this is the machine they have been waiting for.
