

FIRM

Under the notion of the firm in this description it is understood the signboard at the entrance to the object - premises.

The main condition that the firm has to meet is that the firm be correctly made in graphic and technical sense. Besides, the firm is to be intended for external installation, what means to remain unchanged - readable after a longer series of years and therefore we are making the firms in the engraving technology on the materials of the best quality.

A standard firm comprises the manufacturing of the firm with one of our standard fonts in Cyrillic and Latin alphabets and of standard dimensions. The manufacturing of logotype or of trademark is considered as a special requirement and has been specially defined.

dimensions: Standard dimensions of signboards made of anodized aluminum are: 500 x 320 mm and 320 x 240 mm, and the firms made of GRAVOGLAS are 400 x 300 and 300 x 200 mm.

colors: The colors of signboards made of aluminum and GRAVOGLAS are: golden, silver and black. Standard colors to paint the engraved text are: black, red, white and blue.

materials: Electrolytic and anodized (opaque) aluminum and GRAVOGLAS (two - layered transparent plastic engraved and painted at the back side). Both materials are special purposeful materials for external installation and are the products of the American company NEW HERMES.

technique of the inscription of the text: By engraving with programmed CNC machine and painting of the engraved text.

installation: By ornamented eloxated screws (in the color of the signboard) delivered together with the signboard.

* The manufacturing of the firm on the brass may be done on special request, but we do not recommend it because its maintenance is burdensome. The manufacturing of signboards of non - standard dimensions is also available.
