

## **FLOOR DESIGNATION PLATE**

The standard plate to designate the floor means a more simple and less expensive variety of designation of the floor. It is most suitable to designate the accessory and fire escape staircases, the technical levels and the elevator panes.

It is suitable to designate the floors in business and apartment buildings and it is placed before the elevator and in the staircase.

The standard plate is produced both in Cyrillic and Latin variants with font HELVETICA. In the Cyrillic variant the floor number is in Arabic numerals and in the Latin variant in Roman numerals.

**dimension:** The width of the board is 300 mm, and the height is 60 mm.

**color:** The color of milky white clirit with the text painted in black.

**material:** Milky white clirit, 3 mm thick.

**production technique:** Engraving with programmed CNC machine and painting of the engraved text.

**installation:** By two attachment screws. Depending on basis with wedges or on the wood or metal directly.

\* On special request the standard plate may be attached by plain head screws and attach a new one of identical size of GRAVOPLY material of one of the standard colors over it. The manufacturing of a plate of self - sticking GRAVOPLY material is also possible if it is to be placed on marble, glass or wood paneled wall.
