

“NEW HERMES” DOOR DESIGNATIONS

The inscription is intended for designation of the individual rooms in the representative business space.

The insert with the name of the room - service made of GRAVOPLY material is put into the specially designed and electropolished aluminum profile. The main features of this inscription are a rich outlook and the possibility of exchange of the inscriptions.

It has been used to place this inscription at the more important spaces as: the manager, design bureau, festive hall, meeting hall and the like.

dimension: The standard dimensions of the inscriptions are 203.2 x 50 mm and those of the insert 203.2 x 39 mm.

color: The color of the insert is one of the colors of the GRAVOPLY material on choice.

material: The carrying profile is of electrolytic, electropolished aluminium and is a product of the American company NEW HERMES. The insert is of two - layered GRAVOPLY material of the same manufacturer.

production technique: By engraving by the programmed CNC machine the upper layer of the two - layered GRAVOPLY material is removed under which there emerges the lower layer of different color.

installation: The profile could easily be attached to the door by two wood screws delivered together with the profile.

*The true outlook of the inscription one comes to just after viewing the sample.
