

TRANSPARENT SPACE DESIGNATION LABEL

Because of many requests often made by our users, this more simple variant of designation the spaces we have been included into our production program.

The label is made of transparent clirit with the number of the space engraved, and intended for insertion of the name of the service and the name of the official on paper.

The user himself may type the necessary text and merely to put it under the label by loosening slightly the attachment screw. If the user has a laser printer available and he has printed the inscription on colored paper he would get a better visual impression.

dimension: The standard label dimension is 80 x 110 mm.

color: Transparent clirit with the number painted in black.

material: Transparent clirit of 3 mm thickness.

production technique: Precisely cut out, the lowered phased border, engraved number and the holes processed by the milling machine for attachment by the programmed CNC machine.

installation: By the plain head screw delivered together with the label.

*If the user has got no laser printer we are able to do this service, too.
