

SPACE DESIGNATION NUMBERS

The numbers are intended for the doorframe above the door or for the door itself. It is needed to anticipate them at all spaces bearing in mind that every space had an adequate key and a pendant with the same number. Care should be taken of the partition accessory doors which mainly stay unsecured, and so neither the key nor the pendant could have a designation. It is recommended that in such cases, beside the number, an additional designation be added, for instance /1 or /4.

If a space is designated by an aluminum profile Al 80 to designate the spaces including the space number too, putting this number is not needed.

dimension: Standard dimension of the number is 50 x 30 mm.

color: By the choice of architect - investor from the producer's shade chart with more than 20 shades.

material: GRAVOPLY material, an American producer NEW HERMES product.

production technique: By engraving by the programmed CNC machine the upper layer of the two - layered GRAVOPLY material is removed under which there emerges the lower layer of different color.

installation: The numeral is attached by double self - sticking tape 3M 468MP which provides a solid connection to the background.

*The manufacturing of numbers of other dimensions, shapes and materials depending on the interior, is possible.
