

INVENTORY PLATES

Together with the key pendants, the inventory plates represent the smallest, but in any case the unavoidable elements of visual communication in the building.

In new - built objects the numbering of inventory plates is beginning with the number 00001 and is continued in series to the number needed. The standard plate contains the name of the firm and the needed numbering.

The total number of plates is determined according to the number of the designed fundamental funds in the object (closets, tables, chairs and so on), as well as according to the fundamental funds the investor - user is planning to place after the completion of the building.

dimension: The standard dimension of the inventory plate is 36 x 15 mm. The height of numerals is 4 mm.

color: The background black, the letters and the field, in which the numbers are knocked into, of the color of aluminum.

material: Eloxated aluminum of 0.5 mm in thickness.

production technique: Planographic printing and numbering with machine.

installation: Gluing with a universal glue.

*On special request the manufacturing of the firm's logotype, attachment of the plate with self - sticking tape, making holes for attachment, manufacturing of other dimension too, or the manufacturing of plates identical to those already present in the object are available. For difficult and industrial circumstances we are producing the inventory plates by the chemical etching technology.
