

LAPEL SIGN SAFETY PIN

The lapel inscription yields the needed information about the person wearing it. It is most often used by the medical personnel, the window clerks, salesmen, the personnel on the fairs and so on.

The inscription is made of light plastic, it lies correctly on the lapel and is easily readable.

At the backside of the inscription there is a safety pin to prevent the accidental drop - off of the label.

dimension: Standard dimension of the lapel sign inscription is 65x20 mm.

color: Golden background, black letters.

material: The inscription is made of two - layered GRAVOPLY material, and the safety pin is made of the chromium coated steel. Both of these elements are made by the American company NEW HERMES.

the symbol production technique: By engraving by the programmed CNC machine the upper layer of the two - layer GRAVOPLY material is removed, and under it there emerges the lower layer of different color.

installation: The person wearing it may put it on and take it off easily.

*On request the production of other dimensions is available. In the former experience we noticed that the inscriptions made of metal were 'dropping off' and were not lying correctly, so we do not recommend them. On special request we are delivering also the lapel inscriptions consisting of a clothespin and a little plastic bag with a changeable insert.
